

CyberAntix™ – Who We Are

# Your Accountability Partner in Cybersecurity Excellence

CyberAntix is a South African-based cybersecurity consultancy built on one simple truth – security is not a product, it's a partnership. We work alongside your leadership and IT teams to build practical, measurable cybersecurity maturity that protects your business, supports compliance, and enables confident digital growth.

Founded in 2020, CyberAntix has become the trusted accountability partner to organisations that demand real impact – not just reports and audits. We design, implement, and manage your security strategy with clear milestones, predictable costs, and transparent results.

# Our DNA: Built on Trust and Action

At CyberAntix, we don't just advise – we act. We bring expertise, empathy, and execution to every engagement.

## Our Core Values

### Care Deeply

We show up with heart for our clients and for each other. We're committed to your success, not just your security.

### Own Our Craft

We are certified, experienced professionals who hold ourselves accountable to the highest standards.

### Stronger Confidence

Your stakeholders see measurable improvement, not just another policy on paper.

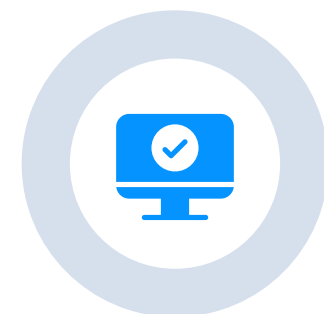

## CyberAntix Defined

We are your accountability partner in action – bridging the gap between strategy and execution. Through collaborative governance and real-time reporting, we drive measurable progress toward cybersecurity maturity.

### Journey to Green:

A structured roadmap with defined milestones and SLAs.

### Embedded Compliance:

From ISO 27001 and NIST to POPIA alignment, we make governance practical.

### Reduced Risk Exposure:

Active detection and rapid containment through automated, intelligent operations.

### Stronger Confidence:

Your stakeholders see measurable improvement, not just another policy on paper.

# Why Companies Choose CyberAntix

## Tailored Solutions

No copy-paste templates or tool overload. We build your cybersecurity roadmap around your environment, your people, and your priorities.

## Pay-As-You-Go Flexibility

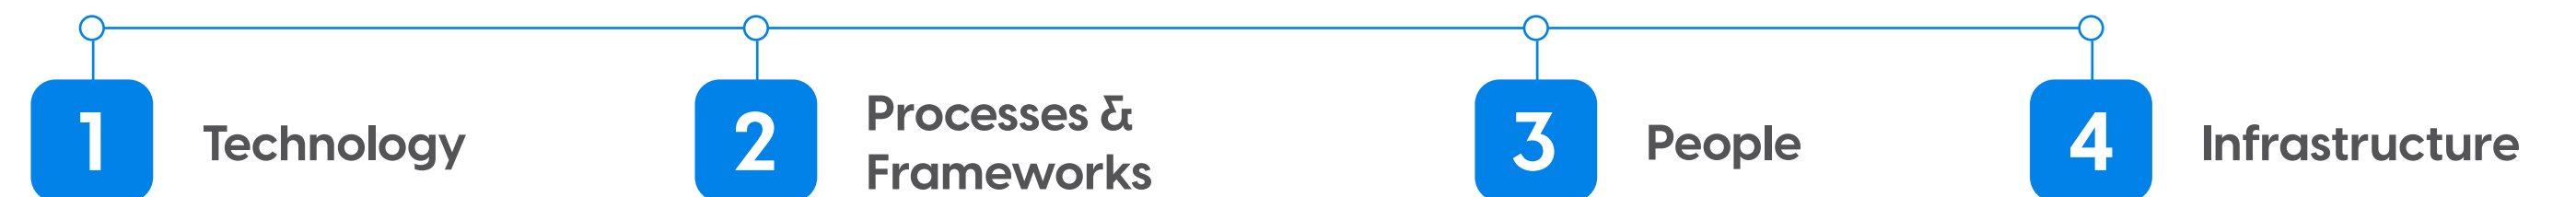

Scale your protection as your organisation evolves. No long-term lock-ins or unnecessary expenditure – just focused, high-impact service.

## Global Expertise, Local Insight

Our experts have global experience in enterprise security, risk, and compliance – delivered with the agility and context of a local partner.

# Our Building Blocks

## 1 Technology

We integrate leading-edge platforms to orchestrate, automate, and assure performance:

- **Unified Defence:**  
Palo Alto XSOAR + SIEM combine to streamline alerts and automate response.
- **Smarter Insight:**  
Our Open Threat Management (OTM) engine filters noise through behavioural analytics.
- **Accountable Delivery:**  
A proactive SLA platform tracks metrics and flags anomalies early.
- **Executive Reporting:**  
Board-ready dashboards demonstrate risk reduction and ROI.
- **Value Delivered:**  
Faster containment, fewer incidents, and a lower total cost of ownership.

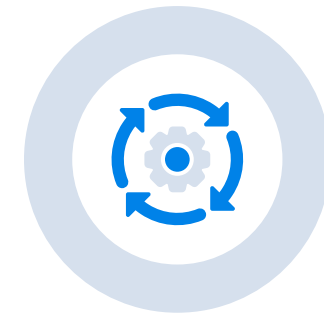

# Our Building Blocks

## 2 Processes & Frameworks

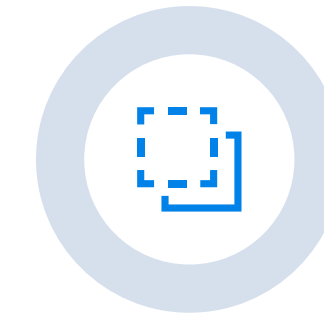

Our operations are built on globally recognised frameworks – ISO 27001, NIST, and the Cybersecurity Framework – ensuring:

24/7 monitoring and rapid incident detection

Continuous process optimisation

Measurable alignment to governance and compliance requirements

### We don't just react to threats; we help you build a culture of proactive resilience

#### 24/7 Managed Security Operations Centre (SOC)

At the heart of CyberAntix's service capability lies our **24/7 Managed Security Operations Centre (SOC)** – a fully managed, always-on command hub that continuously monitors, detects, and responds to threats in real time.

Staffed by experienced analysts and powered by automation and global threat intelligence, the SOC ensures uninterrupted vigilance and rapid containment when it matters most.

#### Continuous monitoring and correlation across multiple data sources

- Proactive detection and automated incident response
- Integration with internal IT and compliance teams for full visibility
- Executive-level dashboards providing real-time risk metrics
- Local and global escalation support for critical incidents

Our SOC forms the operational backbone of CyberAntix's managed services – keeping your organisation protected, compliant, and operationally resilient around the clock.

# Our Building Blocks

## 3 People

CyberAntix brings together a collective century of experience from seasoned professionals certified across CISSP, CISM, CEH, and other globally respected standards. Our people are strategic thinkers and hands-on practitioners – blending advisory expertise with technical depth to keep your business secure, compliant, and future-ready.

## 4 Infrastructure

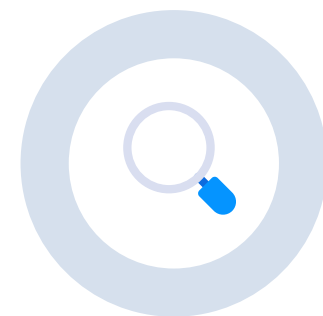

Your data stays where it should – protected and sovereign.

24/7  
availability

Redundant  
and access-  
controlled Tier  
3 data centres

Local data  
sovereignty  
with continuous  
surveillance  
monitoring

# What Sets CyberAntix Apart

## The CyberAntix Advantage

When you partner with us, you're not outsourcing your cybersecurity – you're gaining a committed ally. We help you make informed decisions, manage accountability across teams, and build resilience that scales with your business.

**Secure. Compliant. Confident.**  
**Without the complexity.**
