

DOING BUSINESS ACROSS BORDERS?

**Know who you're dealing with.
Know who signed.
Keep the evidence.**

See Videosign in action

videosign >
accelerating business

Combining Videosign's secure digital contracting technology
with local partnership and client support in South Africa.

One platform. **End-to-end contracting.**

Videosign brings document creation, collaboration, identity verification, signing and audit evidence into one browser-based workflow.

Create

Create and manage documents and templates in-browser.

Collaborate

Review and work on documents securely with colleagues and counterparties.

Verify

Confirm signer identity using built-in and integrated verification options.

Sign

Apply the appropriate electronic signature assurance for the transaction.

Evidence

Retain timestamps, verification details, document activity and, where used, video evidence.

Is the person signing really the person you think they are?

Layer assurance to match the transaction

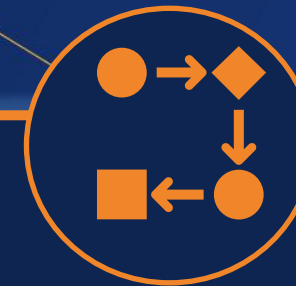

Higher-assurance electronic signatures. QES and applicable AES workflows.

Biometric ID verification. Match the signer to trusted identity evidence.

Validate identity using bank-held data and/or official documents.

Check against relevant risk databases through integrated partners.

Signature Assurance

Not every transaction carries the same risk. Choose the right level of signing assurance.

Simple Electronic Signatures

For everyday electronic agreements

Advanced Electronic Signatures (AES)

For transactions requiring high-assurance identity and signing under the South African framework.

Qualified Electronic Signatures

The highest level of electronic signature assurance under eIDAS.

One platform. Flexible assurance.
